

## **Comprehensive Plan Issues**

**Character Area:**     Transportation / Communication / Utilities

**Description:**   Areas used in providing public transportation, communication, or utility services. Also includes areas supporting some type of industrial uses but not the principle use. These areas may include public or private facilities for wastewater treatment, land application of effluent, landfills, energy generation, resource recovery, or similar uses which may require environmental permits.

**Development Strategy:**   Development of these areas should be in cooperation with established or planned industrial areas. Or, where not feasible, such areas should be well buffered from surrounding residential and commercial properties for both aesthetics and quality of life.

**Character Area:**     Neighborhood Activity Center

**Description:**   A neighborhood focal point with a concentration of activities such as general retail, service commercial, professional office, higher-density housing, and appropriate public and open spaces uses easily accessible by pedestrians and bicycles.

**Development Strategy:**   Each neighborhood center should include a mix of retail, services, and offices to serve neighborhood residents' day-to day needs. Residential development should reinforce the center by locating higher density housing options adjacent to the center, targeted to a broad range of income levels, including multi-family town homes, apartments, and condominiums. Design for each Center should be very pedestrian-oriented, with strong, walkable connections between different uses. Road edges should be clearly defined by locating buildings at roadside with parking in the rear. Direct connections to greenspace and trail networks should be provided. The pedestrian-friendly environment should be enhanced by adding sidewalks and other pedestrian-friendly trails/bike routes linked to other neighborhood amenities such as libraries, neighborhood centers, health facilities, parks, and schools.

### **Goals and Policies:**

**GOAL 6: COMMUNITY FACILITIES** – To ensure the provision of infrastructure, community facilities, and public services that support efficient growth and development patterns.

**GOAL 7: LAND USE** – To ensure the community's anticipated growth occurs in a well-integrated yet organized fashion, which protects our community resources, promotes efficient use of infrastructure and transportation facilities, and supports quality economic development.

**GOAL 8: INTERGOVERNMENTAL COORDINATION** – To encourage coordination of planning efforts with other local service providers and authorities, neighboring communities and state and regional planning agencies.

**GOAL 9: TRANSPORTATION** – To encourage coordination of land use planning and transportation planning to support sustainable economic development, protection of natural and cultural resources, and provision of adequate and affordable housing.
